MIRRACO
BIKE COMPANY

/ WHY TREK.

/ BECAUSE WE BUILD BETTER BIKES.

Easy for us to say — and easy for us to support.

No one has more engineers, testers, and researchers on staff. Trek has over 180 people in our engineering group — 180 really smart people, committed to building really great bikes. More engineering per bike means bikes that last longer, ride better, and retain their value past any other brand.

We have a mantra: Best-in-class bikes, period. It's the benchmark we use to tell us if a new platform is ready to go to market: is this the very best bike for the money?

From Lance Armstrong's Madone to your child's first bicycle, every Trek is measured by the best-in-class yardstick. Built to win, built for work, or built for fun — all our bikes are built to be the absolute best bang for your buck.

/ BECAUSE WE BELIEVE IN A BETTER WORLD.

When Trek began in 1976, our mission was simple: Build the best bikes in the world. Today, we've added to our mission: Help the world use the bicycle as a simple solution to complex problems.

The bicycle is the most efficient form of human transportation. It can combat climate change, ease urban congestion, and build human fitness. It brings us together, yet allows us to escape. And it takes us places we would never see any other way.

Trek. We believe in bikes.

/ BECAUSE WE'LL TAKE GOOD CARE OF YOU.

Trek is a family company, owned by the same family since it was founded back in 1976. You won't find us on the stock exchange, and you won't catch us making decisions based on short-term profits. We take a longer view that focuses on supporting our customers as the healthiest way to build our brand and our business.

We consider everyone who rides a Trek to be part of the family. So we take good care of our family of customers in every possible way, from your first visit to the bike shop throughout the life of your bike. For starters, we sell our bicycles only through independent bike dealers who have the expertise, commitment, and passion to make sure you're riding the right bike, set up right for you, and properly maintained. And we stand behind our products with the best warranty in the business, so that even if something goes wrong, we've got your back.

2011 / MOUNTAIN

/ 2011 MOUNTAIN

EVERY DETAIL MATTERS

TWO-NINE AND REFINED.

/ BIGGER THAN EVER

Welcome to 2011, and the introduction of Trek 29ers. Yeah, we said it. And these aren't just any 29ers. They're the refined, innovative result of our collaboration with the man who got the big wheels rolling a decade ago: Gary Fisher.

Gary's incomparable 29er expertise + Trek's manufacturing mojo = the Gary Fisher Collection. Gary's brilliance, unleashed on the world by the world's best bike unleashers at Trek. If you've been waiting for a Trek 29er, these bikes are your dream come true.

/ BETTER THAN EVER

2011 brings a wealth of new technologies and refinements to our already stellar MTB lineup, such as: OCLV Mountain Carbon, three new ABP configurations; new frames for the carbon Top Fuels, Session 88, and 9.9 SSL; and a line of 29er hardtails featuring Gary Fisher's innovative G2 Geometry.

It's going to be a great year.

OCLV MOUNTAIN IS TOUGHER CARBON.

New for 2011 is OCLV Mountain Carbon, a leading-edge technology that makes our OCLV (Optimum Compaction, Low Void) Carbon less susceptible to damage from rocks and trail debris. Like all Trek Carbon technologies, OCLV Mountain Carbon started with a simple initiative: make it better.

Standard carbon shows its weakness on the trail when rocks kick up at high speed and compromise the frame. That's common knowledge, but there hasn't been a standard trail-debris testing procedure — so we developed our own: the Anvil Strike Test. Strike the frame with a sharp, heavy object at speeds most riders will never achieve, and check the result.

With this test as our guide, we developed OCLV Mountain Carbon, a combination of advanced materials and a unique fabrication process focused on increasing resistance to damage.

The result? We pass the test. Others don't.

**/ CARBON ARMOR**

Sometimes you need a little extra protection, so our Trail and All-Mountain bikes get a light, tough external shield. Our Carbon Armor polymer shield adds reassurance to riders who know their downtube is bound to take some abuse.

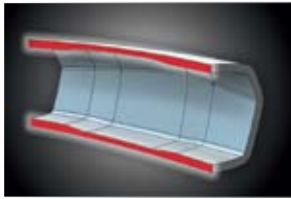

**/ TREK CARBON TECHNOLOGY IS TCT**

Trek has built more high-end carbon frames than any other bike brand, and our highly engineered and rigorously tested OCLV Carbon is the finest available. TCT takes that extensive carbon expertise and applies it to facilities around the world for higher production capacity, bringing a superior ride to more customers than ever before.

All TCT frames benefit from exactly the same testing standards as OCLV. It's our guarantee that every frame lives up to the Trek name.

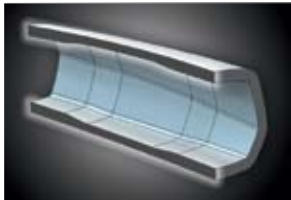

PERFORMANCE ALUMINIUM

Aluminium is a classic frame material — but that hasn't stopped us from looking for ways to enhance the performance of this mainstay throughout our bike line.

/ ALPHA RED: BEST

Alpha Red is a premium aluminium alloy that we hydroform or mechanically form into sophisticated tube shapes with optimized butting profiles for maximum strength and minimum weight.

/ ALPHA BLACK: BETTER

Alpha Black is a high-performance aluminium tested to the standards of its riding category and beyond, with less tube manipulation and fewer weight-saving characteristics than Alpha Red.

/ ALPHA WHITE: GOOD

Alpha White performance aluminium lives up to Trek's industry-leading durability standards, but features straight-gauge tubing for outstanding value.

ABP IS ACTIVE BRAKING

/ ABP CLASSIC & DH

The original ABP provides our innovative active-suspension benefits with either a traditional 135x5mm rear wheel (Classic) or 150x12mm (DH).

/ ABP RACE

ABP Race offers all the performance characteristics of ABP in a narrower, lighter, faster setup that allows skewer lever position independent of tension. Plus, it's thru-axle stiff — 30% stiffer than any other open dropout design.

/ ABP CONVERT

ABP Convert is the same ABP performance you know and love, but now with multiple wheel interface options. New for 2011, ABP Convert comes standard on most Fuel EX and all Remedy bikes, for use with a 142x12mm rear wheel and Maxle Lite thru axle.

Want to use an old 135x5mm wheel? All ABP Convert-equipped bikes are reverse compatible — they ship with extra hardware + skewer to allow an easy, flawless switch to the old system.

/ ABP CONVERT FR

ABP Convert FR is the same concept as ABP Convert, but changes from a 135x12mm to a 142x12mm interface with the included hardware.

**FUEL / EX 9.9™**

FRAME / OCLV Mountain Carbon main frame, OCLV Carbon seatstay & chainstay, Carbon Armour, ABP Convert, Full Floater, E2, Magnesium EVO Link, 120mm Travel

2011 / ROAD

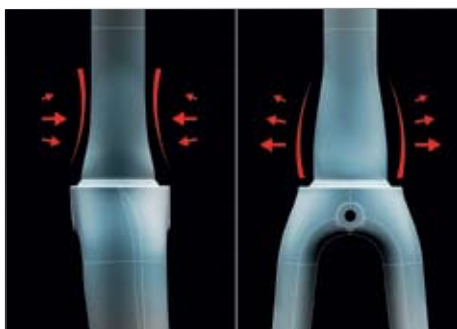

/ MADONE TECHNOLOGIES

Madone is engineered to give athletes like Lance Armstrong and Levi Leipheimer a competitive advantage with the best equipment on the planet. The resulting assets — Grand Tour comfort, precise handling, instant acceleration, unmatched durability — await every rider who throws a leg over a Trek road bike. Ride a Madone, and you'll get the geometry, design, and soul of a 9X Tour de France Champion.

/ BB90 BOTTOM BRACKET

BB90 is the widest bottom bracket available on a road bike. This Trek-exclusive technology eliminates the need for extra inserts and parts in the bottom bracket/frame junction and widens the most important part of the frame structure, making Madone lighter, more responsive, and quicker to accelerate than the competition.

/ E2 ASYMMETRIC STEERER

A fork has two competing directives: provide lateral rigidity for precision cornering, and offer vertical compliance to absorb road imperfections. Trek's E2 asymmetric fork/steering tube is the first steerer specifically shaped to manage both: wider side to side to stiffen under cornering load, and narrower front to back to offer just the right amount of flex. It all adds up to revolutionary handling performance.

/ DUOTRAP SENSOR

DuoTrap seamlessly integrates the computer sensor into the frame to measure speed, distance, and cadence with no added aerodynamic drag. All carbon Madone frames feature a recessed chainstay mount for flush installation of the ANT+ wireless sensor (sold separately).

/ RIDE TUNED SEATMAST

We designed Trek's Ride Tuned Seatmast to save energy and counter the pounding doled out by three-week Grand Tours. It's the lightest and most comfortable solution for riders interested in day-in, day-out performance and comfort.

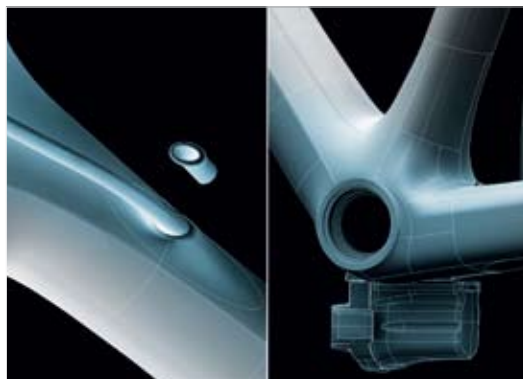

/ INTEGRATED CABLE MANAGEMENT

Trek's integrated cable management is highly engineered for sleek styling and the real-world performance that comes from better compatibility with current drivetrains. Optimal cable routing offers flawless shifting, better braking, and easier assembly and maintenance.

/ LOAD PATH DESIGN

Having our carbon fibre engineering and manufacturing in-house allows us to manipulate our carbon to the greatest sophistication in the bike industry. Prime example: Load Path Design. Each part of a bike is designed to handle different loads and perform different functions. We build sensitive strain-gauge measurement devices into our carbon test frames so we can precisely measure and manage each load, resulting in better, more refined bicycles.

/ Di2 OPTIMISATION

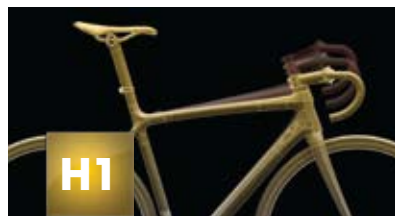

Di2-specific cable stops and a slick bottom bracket battery mount allow the Madone to perfectly interface with the industry-leading Shimano Di2 electronic drivetrain system without a single zip tie or strip of tape. It's the most seamless component integration in the industry.

/ MADONE FIT

THE RIGHT FIT IS EVERYTHING.

Introducing the widest pro platform size range on the market today. The 2011 Madone range features three different pro-level fits: H1, H2 and H3. No matter your body shape, flexibility, or size, we've got the right fit to give you the most comfort, efficiency, stability, and power

on the road. The fits vary primarily in hand position—H1 lowest, H3 highest. Each fit has the same single-minded purpose: make the best bike on the planet fit every rider. Perfectly.

Developed for athletes with extraordinary range of pelvic rotation, superior core stability, and the desire to get low and aero, H1 offers the lowest hand position options available for Madone. The choice of most team Radio Shack riders.

The right fit for most riders, H2 retains all the handling geometry and ride characteristics of the H1 platform, with a slightly higher head tube height to put less strain on a rider's back and neck. It will also accommodate riders with slightly less pelvic rotation and core stability. The H2 higher head tube is the right way to get most riders in the right place. No goofy high-rise stems, no huge stack of spacers—the look is nothing but pro. The right fit for select Team Radio Shack riders.

H3 increases head tube height a bit beyond H2, with a slight geometry adjustment to increase the bike's stability. Perfect for those who need a back-saving, neck-saving, more upright position, but still want pro-level performance and a pro look. No high-rise stems or huge stack of spacers. The chosen fit of Team Radio Shack Director Sportif Johan Bruyneel. Fast as hell, strong as hell, and the perfect choice when the desire for comfort trumps aero.

/ SPEED CONCEPT

THE FASTEST WAY TO THE FINISH.

WHY SPEED CONCEPT 9 SERIES? /

It's the fastest triathlon/time trial bike on the planet. Its revolutionary design pairs a groundbreaking aero shape with the cleanest integration of brakes, cables, and electronics ever seen on a bicycle.

RIDER PROFILE / Are you a speed freak?

The 9 Series is our top-of-the-line bike for those who put speed above all else.

NEW FOR 2011 / Everything. This is a revolutionary new tri/TT bike in every category of bicycle design.

LINEUP /

Speed Concept 9.9
Speed Concept 9.5
Speed Concept 7.5
Speed Concept 7.0
Speed Concept 2.5

PROJECT ONE

1 / KVF TUBE SHAPE

Kammtail Virtual Foil. It's the most aerodynamic tube shape ever designed for a bicycle.

2 / HIDDEN FROM THE WIND

Integrated front and rear brakes, internal frame routing, optional integrated DuoTrap electronics, and integrated storage dramatically decrease drag and save time.

3 / UNMATCHED ADJUSTABILITY

Speed Concept 9 Series has the largest range of adjustability of any elite tri/TT bike.

4 / WIND-TUNNEL PROVEN

We've tested every major competitor in the wind tunnel, and Speed Concept is the fastest. Period.

/ SECONDS HERE

"The first time I saw Speed Concept was at San Diego wind tunnel early in 2009. As soon as I saw it, I knew I simply had to have it. For more than a decade now, I've worked with Trek on developing bikes that give me an advantage in Time Trials. Speed Concept took that development to a whole new level."

Lance Armstrong

/ MINUTES THERE

"I sought out Trek 5 years ago because they were building bikes to give Lance Armstrong seconds of free time. For me, that adds up to 3, 5, 10 minutes at the end of 112 miles. With the Speed Concept, I know I have the fastest bike on the course. Period."

2011 / HYBRID / CITY

EVERYONE CAN GO BY BIKE.

NAVIGATOR / 3.0™

FRAME / Alpha White Aluminium

FORK / SR Suntour NEX, preload, lockout, 50mm

WHEELS / Alloy front hub, Shimano RM60 rear hub, Bontrager Camino rims

CRANK / Shimano M171 48/38/28 w/chain guard

BRAKES / Tektro V w/EF60 levers

REAR DERAILLEUR / Shimano Alivio

COLOUR / Satin Silver Duotone

SIZES / 16.5, 18.5, 21"

NAVIGATOR / 2.0™

FRAME / Alpha White Aluminium

FORK / SR Suntour NEX, preload, 50mm

WHEELS / Alloy hubs, Bontrager 550 alloy rims

CRANK / Shimano M131 48/38/28 w/chain guard

BRAKES / Tektro V w/Tektro levers/Kraton insert

REAR DERAILLEUR / SRAM X3

COLOUR / Charcoal Metallic Duotone

SIZES / 14.5, 16.5, 18.5, 21"

7.3 / FX™

FRAME / FX Alpha Black Aluminium
FORK / FX Alloy w/tapered wall thickness, straight blades, Clix dropouts
WHEELS / Alloy front hub, Shimano RM30 rear hub, Bontrager Nebula alloy rims
CRANK / Shimano M361 48/38/28 w/chain guard
BRAKES / Avid SD-3 w/Shimano EF60 levers
REAR DERAILLEUR / Shimano Deore
COLOUR / Maroon/Sand
SIZES / 17.5, 20"

7.1 / FX™

FRAME / FX Alpha White Aluminium
FORK / Hi-tensile steel w/lowrider mounts, straight blades
WHEELS / Alloy hubs, Bontrager 750 alloy rims
CRANK / Shimano M131 48/38/28 w/chain guard
BRAKES / Tektro V-brakes w/Shimano EF51 levers
REAR DERAILLEUR / Shimano Acera
COLOUR / Matte Silver/Dark Silver
SIZES / 17.5, 20"

7100™

FRAME / Alpha White Aluminium
FORK / SR Suntour NEX, preload, 50mm
WHEELS / Alloy hubs, Bontrager 750 alloy rims
CRANK / Shimano M131 48/38/28 w/chain guard
BRAKES / Tektro V w/Shimano EF51 levers
REAR DERAILLEUR / Shimano Acera
COLOUR / Onyx
SIZES / 17.5, 20"

2011 / WSD

TOP FUEL 8 / WSD™

FRAME / WSD Alpha Red Aluminium

FORK / RockShox Reba RL w/air spring, rebound, remote lockout, alloy steerer, 100mm

REAR SUSP / Fox Float RP-2, "Race Tuned" w/ ProPedal, rebound; 6.5 x 1.5"

WHEELS / Bontrager Race Lite Disc, Tubeless ready

CRANK / Shimano SLX, 42/32/24

BRAKES / Avid Elixir R Hydraulic Disc

REAR DERAILLEUR / Shimano SLX 10sp

COLOUR / Gloss Raw/Blue

SIZES / 14.5, 15.5, 16.5"

FUEL EX 8 / WSD™

FRAME / WSD Alpha Red Aluminium

FORK / Fox 32 F-Series RL w/air spring, rebound, alloy E2 tapered steerer, 120mm

REAR SUSP / Fox Float RP-2, "Trail Tuned" w/Trek DRCV, ProPedal, rebound; 7.25 x 2.0"

WHEELS / Shimano Alloy hubs, Bontrager Duster Rims

CRANK / Shimano M542 44/32/22

BRAKES / Avid Elixir 5 Hydraulic Disc

REAR DERAILLEUR / Shimano XT Shadow 10sp

COLOUR / Raw Lavender

SIZES / 14.5, 15.5, 16.5"

FUEL EX 5 / WSD™

FRAME / WSD Alpha Red Aluminium

FORK / RockShox Recon Silver TK w/coil spring, preload, rebound, TurnKey Lockout, alloy steerer, WSD Rider Right spring weight, 120mm

REAR SUSP / Fox Float RP-2 "Trail Tuned" w/ ProPedal, rebound; 7.0 x 2.0"

WHEELS / Formula Alloy DC20 & Shimano Alloy M75 hubs, Bontrager Ranger rims

CRANK / Shimano M442 44/32/22

BRAKES / Avid Juicy 3 Hydraulic Disc

REAR DERAILLEUR / SRAM X5

COLOUR / Gloss Charcoal/Mint

SIZES / 14.5, 15.5, 16.5"

6000 DISC / WSD™

FRAME / WSD Alpha Black Aluminium

FORK / RockShox Tora TK w/Coil Spring, rebound, TurnKey lockout, alloy steerer, WSD Rider Right spring weight, 100mm

WHEELS / Shimano Alloy hubs, Bontrager Ranger Rims

CRANK / SRAM S800 3.0 42/32/22

BRAKES / Avid Juicy 3 Hydraulic Disc

REAR DERAILLEUR / SRAM X5

COLOUR / Satin Crystal/White Pearl

SIZES / 14.5, 15.5, 16.5"

SKYE SL DISC / WSD™

FRAME / Alpha Black Aluminium

FORK / Spinner 300, w/coil spring, preload, hydraulic lockout, WSD Rider Right spring weight, 80-100mm

WHEELS / Formula and Shimano Alloy Hubs, Bontrager Ranger rims

CRANK / Shimano M311 42/32/22

BRAKES / Promax DSK-907 Hydraulic Disc

REAR DERAILLEUR / Shimano M410

COLOUR / Wine

SIZES / 14, 16, 18"

SKYE / WSD™

FRAME / WSD Alpha White Aluminium

FORK / SR Suntour M-2025 w/coil spring, 63mm

WHEELS / Formula Alloy Hubs, Bontrager 550 rims

CRANK / Shimano M131 48/38/28

BRAKES / Tektro V

REAR DERAILLEUR / Shimano TX31

COLOUR / Charcoal

SIZES / 13, 16"

**MADONE 4.5 / WSD™**

FRAME / 4 Series TCT Carbon, E2, DuoTrap compatible

FORK / Bontrager Race Lite Carbon

WHEELS / Bontrager SSR

CRANK / Shimano R-553 50/39/30

REAR DERAILLEUR / Shimano 105

COLOUR / White Shell

FIT / WSD

SIZES / 47, 50, 52cm

**LEXA S / WSD™**

FRAME / Alpha White Aluminium

FORK / Bontrager Approved Carbon

WHEELS / Alloy Hubs; Bontrager Approved Alloy Rims

CRANK / FSA Vero 50/34

REAR DERAILLEUR / Shimano Tiagra

COLOUR / Satin Earl Grey

SIZES / 47, 50, 52cm

**LEXA / WSD™**

FRAME / Alpha White Aluminium

FORK / Aluminium

WHEELS / Alloy Hubs; Bontrager Approved Alloy Rims

CRANK / FSA Tempo 50/34

REAR DERAILLEUR / Shimano 2300

COLOUR / White Shell

SIZES / 47, 50, 52cm

**7100 / WSD™**

FRAME / Alpha White Aluminium

FORK / SR Suntour NEX, preload, 50mm

WHEELS / Alloy hubs, Bontrager 750 alloy rims

CRANK / Shimano M131 48/38/28 w/chain guard

BRAKES / Tektro V w/Shimano EF51 levers

REAR DERAILLEUR / Shimano Acera

COLOUR / Onyx

SIZES / 15, 17.5"

**NAVIGATOR 2.0 / WSD™**

FRAME / Alpha White Aluminium

FORK / SR Suntour NEX, preload, 50mm

WHEELS / Alloy hubs, Bontrager 550 alloy rims

CRANK / Shimano M131 48/38/28 w/chain guard

BRAKES / Tektro V w/Tektro levers

REAR DERAILLEUR / SRAM X3

COLOUR / Charcoal Metallic Duotone

SIZES / 13, 16.5"

2011 / KIDS

EVERY KID SHOULD HAVE A GREAT BIKE.

MT220 / BOYS™

FRAME / Alpha White Aluminium

FORK / Dialed SR Suntour suspension 50mm

WHEELS / Aluminium Hubs, 24" rims

CRANK / Dialed adjustable length 127-152mm
42/32/24

BRAKES / Linear pull w/Dialed alloy levers

REAR DERAILLEUR / Shimano TX35

COLOUR / Black/Red

SIZES / 24" Dialed frame size

MT220 / GIRLS™

FRAME / Alpha White Aluminium

FORK / Dialed SR Suntour suspension 50mm

WHEELS / Aluminium Hubs, 24" rims

CRANK / Dialed adjustable length 127-152mm
42/32/24

BRAKES / Linear pull w/Dialed alloy levers

REAR DERAILLEUR / Shimano TX35

COLOUR / Purple/Pearl White

SIZES / 24" Dialed frame size

2011 / MIRRACO

ESSEX™

FRAME / 2-Tube Crmo (D/T & T/T), rotor, mid BB shell

FORK / Tapered Crmo legs

WHEELS / Alex Y-303 alloy, 14mm hollow rear axle

TIRES / Innova Park 20x2.125 front, 20x2.0 rear

CRANK / Vise 3pce Crmo 170mm 25T

BRAKES / C-Star rear U-Brake w/Black Label pads, Tektro XL 320 lever

COLOUR / Pearl White

SIZE / 20.25" top tube

GARGOYLE™

FRAME / 2-Tube Crmo (D/T & T/T), integrated head tube, mid BB shell

FORK / Tapered Crmo legs

WHEELS / Alex Y-303 alloy, 14mm hollow rear axle

TIRES / CST Chaotic 20x2.125 front, smooth 20x1.95 rear

CRANK / Vise 3pce 175mm 25T

BRAKES / C-Star rear U-Brake w/performance pads, Tektro XL 320 lever

COLOUR / Red

SIZE / 20.5" top tube

VELLE™

FRAME / 2-Tube Crmo (D/T & T/T), mid BB

FORK / Tapered Crmo legs

WHEELS / Alex C-303 alloy, 14mm rear axle

TIRES / CST Chaotic 20x2.125 front, smooth 20x1.95 rear

CRANK / Vise 3pce Crmo 170mm 25T

BRAKES / C-Star rear U-Brake w/Black Label pads, Tektro XL 320 lever

COLOUR / Flat Black

SIZE / 20.25" top tube

I'M GARY FISHER, DREAMER OF BIKES.

I've been dreaming about them forever. Since before I threw some motorcycle parts on a WWII cruiser bike and took it off road. Since the first time my friends and I bombed our new inventions down Mt. Tam — and hitchhiked back up so we could do it all over again. Since I coined the term "mountain bike," and started a company by that name to spread the word.

And I've been dreaming ever since.

But now I have a really big dream. To get more people on bikes — everywhere. To take my message global. Bigger. Bolder. Broader. It's a goal my friends at Trek are helping me achieve. We're combining forces. My dreams, brought to you by the best bike maker on the planet.

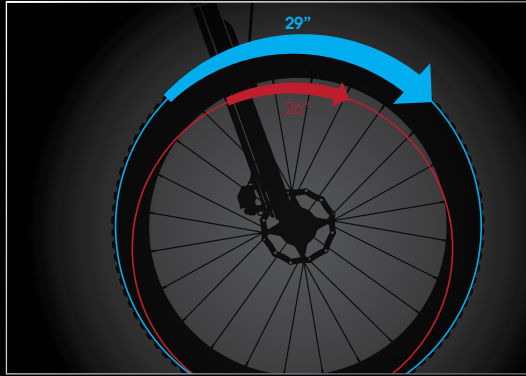

/ THE 29ER ADVANTAGE

HOW DOES TREK MAKE A BETTER 29ER?

THEY WORK WITH GARY.

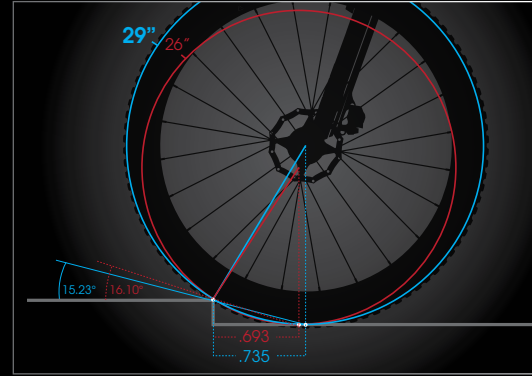

Trek and Gary Fisher are teaming up to usher in the next era of 29ers. Trek's Gary Fisher Collection builds on the great success of Gary Fisher 29ers and further raises the bar for big-wheel mountain bikes. With Trek's backing and Gary's vision, the future of mountain biking is going to be big.

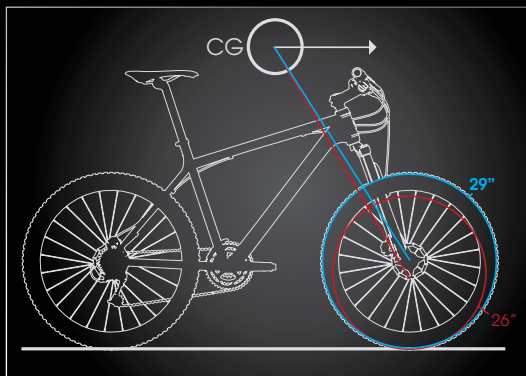

/ MORE MOMENTUM

A bigger wheel holds its momentum better. So you stay rolling over rough stuff and maintain your speed through the corners.

/ BETTER ANGLE OF ATTACK

Increased wheel size decreases the angle of attack. That means bigger wheels make obstacles seem smaller.

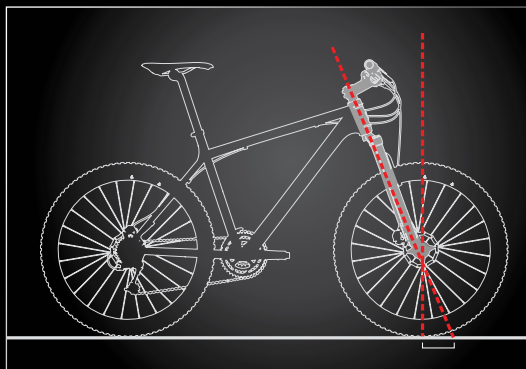

/ GREATER STABILITY

On a 29er, the rider's center of gravity is lower relative to the pivot point (the front axle). This results in a more stable feeling, as if the rider is sitting in a cockpit.

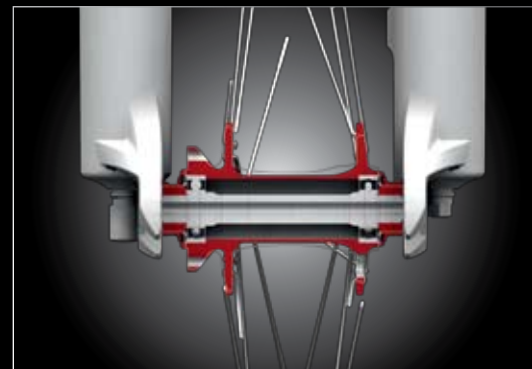

/ IMPROVED TRACTION

A 29" tyre has a longer contact patch. This greatly improves climbing and cornering ability, and it helps the bike float over soft terrain such as sand.

/ G2 GEOMETRY FOR 29ERS

Everyone loves the high-speed stability of 29ers, but a common criticism of big-wheel bikes has been their sleepy steering. To overcome this shortcoming, Gary worked with our suspension partners to develop 29er-specific G2 Geometry. G2 29ers feature a proprietary 51mm offset fork to improve handling in tight, twisty singletrack without compromising high-speed stability. It's the best of both worlds.

/ FCC MTB

FCC MTB benefits from oversized hub, flanges, and end caps to create a flex-free wheel that chews through technical terrain, giving riders more confidence in rough stuff and in the corners.

- Taller and wider flanges create a wider, stronger hub-to-rim bracing angle
- Oversized hub supports taller flanges for a robust, flex-free setup
- Oversized 25mm endcaps strengthen the hub-to-fork interface for less front-end deflection.

SUPERFLY 100 / ELITE™

FRAME / OCLV Carbon co-molded main frame and stays, G2 Geometry, E2 head tube, ABP, topswing carbon link

FORK / Fox F100 RLC 29 w/E2 Steerer, custom G2 geometry, 51mm offset crown, 100mm

REAR SUSP / Fox Float RP23, custom "Race Tuned" w/boost valve, 3 position ProPedal, external rebound, 7.25 x 1.75"

WHEELS / Bontrager Race X Lite FCC Disc 29

CRANK / SRAM XO 39/26

BRAKES / Avid X0 Hydraulic Disc

REAR DERAILLEUR / SRAM XO 10sp

COLOUR / Matte White/Matte Black

SIZES / 15.5, 17.5, 19, 21"

SUPERFLY / 100™

FRAME / OCLV Carbon co-moulded main frame and stays, G2 geometry, E2 headtube

FORK / Fox F29 RL w/E2 Steerer, custom G2 geometry, 51mm offset crown, lockout force adjustment, 100mm

REAR SUSP / Fox Float RP2, custom "Race Tuned" w/boost valve, 3 position ProPedal, external rebound, 7.25 x 1.75"

WHEELS / Bontrager Race Lite FCC Disc 29

CRANK / Shimano M552 44/32/22

BRAKES / Avid Elixir R Hydraulic Disc

REAR DERAILLEUR / SRAM X9 10sp

COLOUR / Matte Grey/White/Black

SIZES / 15.5, 17.5, 19, 21"

HIFI / DELUXE™

FRAME / 6011 hydroformed butted aluminium main frame & stays, G2 29" Geometry, top swing magnesium link, E2, ABP

FORK / Fox F100 RL 29 w/E2 Steerer, custom G2 geometry, 51mm offset crown, 100mm

REAR SUSP / Fox Float RP2, 2-position ProPedal, external rebound; 7.25x1.75"

WHEELS / Bontrager FCC front hub, Shimano M525 SL rear hub, Bontrager Mustang Disc 29 rims

CRANK / Shimano M552 44/32/22

BRAKES / Avid Elixir 5 Hydraulic Disc

REAR DERAILLEUR / SRAM X9 10sp

COLOUR / Matte Black Titanite
Matte Pearl White

SIZES / 15.5, 17.5, 19, 21"

RUMBLEFISH™

FRAME / 6011 hydroformed butted aluminium main frame & stays, G2 29" Geometry, DRCV shock mount, E2, ABP

FORK / RockShox Reba RL 29 w/Motion Control lockout, custom G2 Geometry, 51mm offset crown, 20mm thru-axle, 120mm travel

REAR SUSP / Custom Fox Float RP2 w/DRCV, 2-position ProPedal, external rebound

WHEELS / Formula DHL92 20mm thru-axle front hub, Shimano M529 rear hub, Bontrager Duster Disc 29 rims

CRANK / SRAM S1000 44/32/22

BRAKES / Avid Elixir 3 Hydraulic Disc

REAR DERAILLEUR / SRAM X7 10sp

COLOUR / Fox Matte Ti/Matte Black

SIZES / 15.5, 17.5, 19, 21"

SUPERFLY™

FRAME / Monocoque carbon, G2 29" Geometry, E2 head tube

FORK / Fox F29 FIT RL w/E2 steerer, custom G2 Geometry, 51mm offset crown, 100mm travel

WHEELS / Bontrager Race Lite FCC Disc 29

CRANK / Shimano M552 44/32/22

BRAKES / Avid Elixir R Hydraulic Disc

REAR DERAILLEUR / SRAM X9 10sp

COLOUR / Matte White/Matte Black

SIZES / 17.5, 19"

**X-CALIBER™**

FRAME / 6061 butted & hydroformed aluminum, cold-forged dropouts, G2 29" Geometry

FORK / RockShox Reba RL 29 w/Motion Control lockout, custom G2 Geometry, 51mm offset crown, 100mm travel

WHEELS / Shimano M525 hubs; Bontrager SSR Disc 29 rims

CRANK / SRAM S1000, 44/32/22

BRAKES / Avid Juicy 3 Hydraulic Disc

REAR DERAILLEUR / SRAM X7 10sp

COLOUR / Matte Black Titanite
Matte Crystal White Pearl

SIZES / 15.5, 17.5, 19, 21"

**COBIA™**

FRAME / 6061 butted & hydroformed aluminum, cold-forged dropouts, G2 29" Geometry

FORK / RockShox Recon 29 w/Solo Air, TurnKey lockout, custom G2 Geometry, 51mm offset crown, 100mm travel

WHEELS / Shimano M475 hubs; Bontrager Duster 29 Disc rims

CRANK / Shimano Alivio, 42/32/22

BRAKES / Promax Hornet Hydraulic Disc

REAR DERAILLEUR / SRAM X7

COLOUR / Matte Burnt Orange/Matte Black Titanite

SIZES / 15.5, 17.5, 19, 21"

**RIG / SINGLE SPEED™**

FRAME / 6061 butted & hydroformed aluminum, cold-forged dropouts, G2 29" Geometry, sliding vertical dropouts

FORK / Fox F100 RL 29 w/custom G2 Geometry, 51mm offset crown, 100mm travel

WHEELS / Bontrager FCC front hub, Bontrager Race rear hub; Bontrager Mustang Disc 29 rims

CRANK / Truvativ Firex 1.1G, 32T w/guard

BRAKES / Avid Juicy 3 Hydraulic Disc

COLOUR / Matte Earl Grey/Matte Midnite Teal

SIZES / 15.5, 17.5, 19, 21"

MARLIN / SINGLE SPEED™

FRAME / 6061 butted & hydroformed aluminum, cold-forged dropouts, G2 29" Geometry, sliding vertical dropouts

FORK / SR Suntour SF11 XCT V3 w/mechanical lockout, preload, custom G2 Geometry, 51mm offset crown, 100mm travel

WHEELS / Formula DC20 front hub, KT TB5R SS disc rear hub; Bontrager Ranger 29 Disc rims

CRANK / Truvativ E400 1.1G, 32T

BRAKES / Tektro Novela Mechanical Disc

COLOUR / Matte Black Titanite/Matte Pearl White

SIZES / 15.5, 17.5, 19, 21"

MARLIN™

FRAME / 6061 T6 aluminum, G2 Geometry, butted and hydroformed tubing, cold-forged dropouts & bottom bracket

FORK / SR Suntour SF11 XCT V3 w/mechanical lockout, preload, custom G2 Geometry, 51mm offset crown, 100mm travel

WHEELS / Formula DC20 front hub, Shimano M475 rear hub; Bontrager Ranger Disc rims

CRANK / Shimano Altus, 42/32/22

BRAKES / Tektro Novela Mechanical Disc

REAR DERAILLEUR / SRAM X4

COLOUR / Matte Black Titanite
Matte Vintage Grey

SIZES / 15.5, 17.5, 19, 21"

MAMBA / GS™

FRAME / 6061 butted & hydroformed aluminum, cold-forged dropouts, G2 29" Geometry

FORK / RockShox Tora 29 w/TurnKey lockout, custom G2 Geometry, 51mm offset crown, 100mm travel

WHEELS / Formula DC20 front hub, Shimano M475 rear hub; Bontrager Ranger Disc rims

CRANK / Shimano Acera 44/32/22

BRAKES / SRAM BB5 Mechanical Disc

REAR DERAILLEUR / SRAM X5

COLOUR / Matte Black Titanite/Matte Lilac

SIZES / 14.5, 15.5, 17.5"
